**Planning Process for General Long-Term Care  
Nursing Care Category of Service**

For the General Long-Term Care-Nursing Care Category of Service:

1. Planning areas have been established as depicted above and on detailed maps on following pages.

**INVENTORY OF HEALTH CARE FACILITIES AND SERVICES AND NEED DETERMINATIONS**  
**General Nursing Care**

**Illinois Health Facilities and Services Review Board**  
**Illinois Department of Public Health**

**Page A - 3**  
**8/15/2013**

2. Occupancy target rates are 85% for modernization, 90% for additional beds.
3. Bed need for a planning area is calculated by first determining the minimum and maximum rates of utilization for the entire Health Service Area (HSA) where the planning area is located. These rates are determined for three age groups: 0-64 years, 65-74 years and 75 and over, by dividing the patient days for the age group by the HSA population for that age group. Minimum and maximum rates are set at 60% and 160% of the calculated HSA rate, respectively.

Calculations are then made of the planning area rates of utilization for the three age groups. The calculated planning area rates are compared to the minimum and maximum rates for the HSA. If the planning area rate is less than the minimum, the minimum rate is used; if the area rate exceeds the maximum, the maximum is used; otherwise, the area rate is used.

For each age group, the rate being used is multiplied by the projected area age group population to calculate projected age group patient days. The sum of these calculated patient days is first divided by 365 to determine the projected Average Daily Census, which is divided by 0.9 to adjust for the 90 percent target occupancy rate, to determine the projected number of beds needed for the planning area.

8/15/2013

## Planning Process for Long-Term Care for the Developmentally Disabled (Adult)

For the Long-Term Care for the Developmentally Disabled (Children) category of service:

1. For facilities licensed as ICF/DD 16-bed or fewer, total bed need and the number of additional beds needed are determined by dividing the planning area's projected adult developmentally disabled population by 21.4 to determine the total number of beds needed for developmentally disabled adult residents in the area. The number of additional beds needed or excess beds is determined by subtracting the number of existing beds in ICF/DD 16-bed or fewer facilities from the total number of beds needed for developmentally disabled adult residents in the planning area.

**INVENTORY OF HEALTH CARE FACILITIES AND SERVICES AND NEED DETERMINATIONS**  
**Specialized Long-Term Care**

Illinois Health Facilities and Services Review Board  
Illinois Department of Public Health

Page B - 3  
8/15/2013

Example:

Projected Number of Developmentally <u>Disabled Adults in year 2015 – HSA 1</u>	DMH/DD <u>Divisor</u>	Number of “ICF/DD 16-bed or <u>fewer” Beds Needed – HSA 1</u>
5,177	21.4	242

The number of beds needed, 242, is compared to the sum of the existing and permit beds in the area, 360, to determine that there is an excess of 118 beds in that area.

2. For ICF/DD facilities with more than 16 beds, no bed need formula has been established.

**INVENTORY OF HEALTH CARE FACILITIES AND SERVICES AND NEED DETERMINATIONS**  
**Specialized Long-Term Care**
